

ETHAN STARR

Profile

Motivated Geographic Information Systems and Technology student at Texas A&M University with 3+ years of experience using ArcGIS Pro and hands-on experience supporting GIS projects across the university. Skilled in geospatial analysis, map development, data management, and troubleshooting complex GIS issues. Proven leader with experience leading groups of up to 40 people through challenging and high-stress environments while maintaining a calm, positive, and authoritative presence. Strong communicator and collaborative team member who works effectively with multiple departments and diverse groups to develop accurate, high-quality solutions.

Education

AUGUST 2023 – PRESENT

GIST, Texas A&M University, College Station, Texas
Geographic Information Systems and Technology

- 3+ years usage of ArcGIS Pro
- Worked on project outlining the trends of education levels and average income across the United States, at the county level and a project exploring relationship between land use and crime in Houston

GRADUATED MAY 2023

James Martin High School - Arlington, Texas
With Honors

Extracurricular Activities

The Singing Cadets, Texas A&M University

AUGUST 2023 – PRESENT

Part of an elite all-male choir on campus, formed in 1893, to enhance the public relations of Texas A&M University through musical presentations and to develop disciplined leaders of character. Currently in a leadership position, section leader, to help build up others and create a tradition of excellence when it comes to musical prowess.

Employment History

GIS Intern, Texas A&M Transportation Department

JUNE 2026 – PRESENT

- Worked on projects throughout the summer and during the 2026 school year
- Projects included a multimodal network dataset, event maps for events around campus, and updating/repairing the official campus map, *Aggiemap*.
- Worked with multiple departments around Texas A&M to ensure the finalized product is approved and consistent everywhere.
- Involved extensive problem solving to troubleshoot the fixes for Aggiemap and the multimodal network dataset.

Hiking Guide, TREK Team Ascend, The Rocky Mountains, Colorado

MAY – AUGUST 2025

- Lead groups of up to 40 people through the Rocky Mountain wilderness with the goal of summiting a 14,000 ft. mountain.
- Coached and counseled hundreds of high school aged campers, helping them up the mountain
- Maintained a calm and authoritative presence in dangerous and high stress situations
- Managed hiking routes the group will take, delegated responsibilities throughout the group, assisted in any problem or unexpected situation, and provided a friendly face and positive attitude.
